

Training company for students at the University of Ruse "Angel Kanchev"

The training company is a program of the foundation "Junior achievement". The main contribution of the initiative is that the students are practically going through the whole activity of the company – from its creation through production and reaching market realization, creating the corresponding organizational relationships, administrative documents and a prototype of their goods or services.

The members of the training company are bachelor and master students. They form a team in which they distribute the main responsibilities under the guidance of a mentor. The business idea is generated and selected by the students themselves and they define the direction of their actions.

The training company cooperates also with business consultants who are mainly managers of micro- and SMEs. They support the students with advice from the various functionalities of the company activity. The meetings take place on the territory of the University of Ruse as well as in the offices and other working premises of the business consultants, including the building of the Bulgarian Parliament in Sofia.

Mentor of the Training company for the University of Ruse is assoc. prof. Daniel Pavlov, PhD.
